## Accurate Descriptions Given

The research division of our organization has spared no time or efforts in getting accurate descriptions for all our stock listed here.

In designating color names we have used the 1115 named colors in "Color Standards and Color Nomenclature" by Robert Ridgway, M.S., C.M. Z.S., etc., Division Curator United States National Museum, as our authority.

A careful study of the descriptions in this book will allow you to make just the right selections for any plantings.

## Over Forty Years of Experience Back of Vos Gladioli

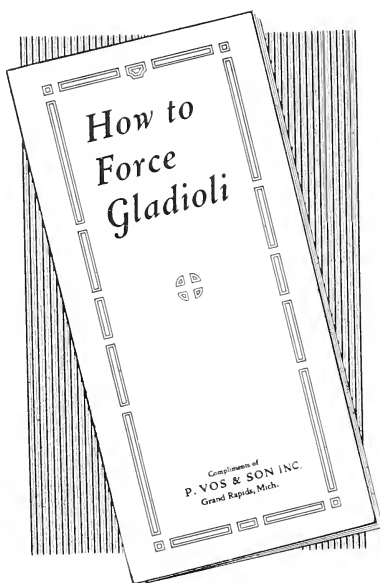

**F**OR years upon years all growers turned to Holland for their bulbs. There were no bulbs like those that came from there. The Hollanders were credited with knowledge due to a nation that spends its life in specializing.

Pieter Vos and his family grew up in the growing of bulbs in "the old country." When he came here in 1919 he brought with him the knowledge of years upon years of study, experiment and growing. Over there he was an authority. Over here he has retained that title — and has added to it by his further experiments and creations.

With the organization which Mr. Vos has gathered around him the growers have a source of knowledge and a source of supply that is as good as anything they can get out of Holland or any other place. Millions of Vos "True-to-Name" Gladioli have been grown and delivered to all parts of the country. And these bulbs have made friends, for one small order always brings back a larger order — growing as time goes on.

If you have not already become acquainted with P. Vos & Son, Inc. — make your selections from this booklet and let the result be our introduction. We believe that our bulbs will make us both good friends.

## A Valuable Book FREE

Adding to our own broad knowledge of the growing of Gladioli we have secured, through an exhaustive survey of florists and growers in all parts of the country, further information as to the planting, kinds of soil suitable, temperature, watering, distance apart in planting and many other vital facts in the growth and production of these beautiful flowers.

All this information has been gathered into a brochure which we will be glad to mail to anyone interested. It is not mailed broadcast, but a request with your name and address will take a copy to you by return mail.

## Vos "True-to-Name" Bulbs

All Vos Bulbs are true-to-name. By the greatest care in selection of planting stock, rotating the crops in the field and again by great care in the warehouses we have brought our stock up to its present high grade condition.

When you place an order with Vos you can be well assured that you will get just what you order, that all varieties will be "true-to-name" and as described in this catalog.

### Vos Grown Narcissi and Tulips

As you know the importation of Narcissus bulbs ceases after January 1, 1926.

Beginning back in 1923 we spent considerable time, energy and money in experimenting in the propagation of these bulbs in this country. We found the soil and our climate decidedly favorable. Bulb travelers from Holland have marvelled at the fine condition of our Michigan grown stock.

After our first experiments we ordered heavily and devoted more of our large fields to the production of these bulbs with the result that we will be able to supply at least part of the demand for high grade bulbs of both Narcissi and Tulips for the season of 1926-27.

### Spireas

We have a limited number of Spirea Clumps for forcing — all strong hardy stock and while they last we offer them at the following prices:

Rubens, rose . . . . .	\$25.00 per 100
Japonica, white, forces for Valentine Day . . . . .	25.00 per 100
America, lavender . . . . .	25.00 per 100
Peach Blossom, pink . . . . .	25.00 per 100

25 clumps at same rate.
